

# THE TOP FOUR

## POLLUTERS IN OFFICE SPACES

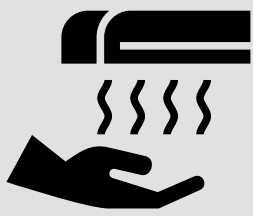

### TISSUES

- 27000 trees are cut down everyday to make tissue papers
- 20% of waste coming from corporate offices is hand wash-tissue papers
- Compost or recycle??

#### ALTERNATIVES

Hand-dryer

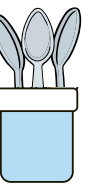

Napkins

### SACHETS

- Contributes to mixed waste because of food content
- Low value waste for recycling

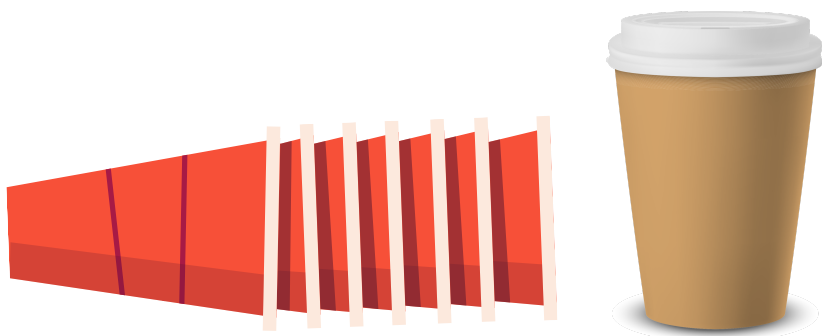

#### ALTERNATIVES

Large quantity in reusable containers

- Sugar/sugar cubes, coffee powder in air tight glass jars
- Cookies/biscuits in airtight glass or steel boxes
- Steel spoons as stirrers
- Premade tea in thermos instead of teabags

### PAPER CUPS

- Contributes to mixed waste because of food content
- Voluminous
- Multi-layer waste, difficult for recycling
- Hot beverage in paper cup can be carcinogenic

#### ALTERNATIVES

- Reusable tumblers - Steel, glass, fibre
- Steel bottles, ceramic mugs with branding gifted to employees

### PET BOTTLES

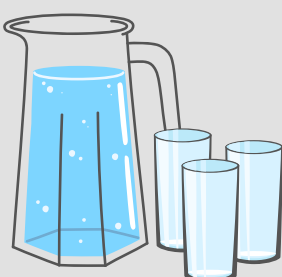

Has high recycling value, but...

- CocaCola produces 3400 bottle every second
- 15.5% of waste that is rotting in the world is PET bottles

#### ALTERNATIVES

- Glass/steel Jars with water and reusable glasses
- Water dispensers with reusable glasses
- Fresh fruit juices served in glass/steel tumblers.
